All line numbers here are for the final commit of the program.

Pass-by-reference: lines 87, 92, 97 and 102 all used ref arguments, among other places.

Arrays: I used string arrays throughout the program, with the first one being on line 16

List: I also uses lists throughout the program, with the first one being on line 19, then 20

if/else: The first if statement I had is on line 44, and the first if/else starting on line 107

Switch: I used a switch statement for my main menu, starting on line 83

Methods: not including the Main method, I had 7 other methods, starting on line 145

while/do-while: My main menu was in a do-while loop, going from line 63 - 132

For: My first for loop is on line 237, and is used to remove items from a list

Foreach: My first foreach loop starts on line 24, and is used to put a string[] into a dictionary

Reading from a file: I read a .txt file into a string array on line 20

Input from the user: The main menu is run with user input, specifically line 80
